1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

3. Claims 1-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lee 2003/0121973 in view of Mariotti 1,924,365. Lee discloses an ATM machine with a casing 10 with an interior portion, i.e. reservoir [0027], and a lockable door 20 with a sliding portion 23 [0029]. It is disclosed that there is means to discharge media from the ATM. Although not specifically disclosed, Official Notice is taken that means to allow media to be input into an ATM is old and well known. It would have been obvious to a person of ordinary skill in the art at the time of the invention to include a media input means in the ATM of Lee to allow for customer deposits. Lee does not disclose that there is a key locking mechanism. Mariotti discloses a housing with an interior portion,

reservoir, and a sliding door. The door is locked by means of a key. It would have been obvious to a person of ordinary skill in the art at the time of the invention to use a key lock on the ATM of Lee. This would provide for a positive mechanical lock on the door hindering any attempt to physically pry open the door.

4. Applicant's arguments filed 4/14/06 have been fully considered but they are not persuasive. Applicant argues that the prior art of record does not disclose using a key to "arm". The examiner respectfully disagrees. Applicant does acknowledge that Mariotti discloses using a key to move between a locked and unlocked position. Thus, using the key in both directions is acknowledged. Therefore, the examiner maintains that Lee and Mariotti as combined encompasses the current invention..

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
